Your first impression is a lasting one...

Before...

After...

**SURFACE LOGOS** is a company who specializes in the strategic design and placement of engraved logos within any walking landscape, allowing your customers a simple way to associate their experience visually with your business.

Today, a logo is the one of the most recognized way a company can establish its brand with a consumer. Logos tend to describe a particular product or service of a business without actually requiring a person to see the business. Although logos can be recognized without the use of names, **using a logo in conjunction with a business name can build instant credibility for any company.** Savvy business owners know they can use their logo to stand out among the rest of their competition. Name recognition for a business or service can almost always be linked to a solid logo.

**SURFACE LOGOS** can engrave your logo in just about any hardened surface both vertically as well as horizontal. The majority of our logos are made in cement, but are not limited to that material.

**Optional services:** Let surface logos put a "WOW" into your next corporate event or school function. Surface Logos can make an exclusive engraved paver to place just about anywhere.

Surface Logos is great for benefit functions for both schools and organizations with "Buy a Brick" fundraising. Already have the brick wall? No problem, we do on the site engraving for your convenience.

At Surface Logos we invite you to join our growing list of satisfied customers that have made the important branding decision to increase their brand awareness by engraving their logo within their own walking landscapes.
